EXPERIENCE

Salesforce Developer Intern

Revvity India Pvt Ltd.

Jan 2026 – Present

Thane, India

- Designed and implemented automation workflows using Salesforce Flow to streamline operations.
- Developed and customized features using Apex and Lightning Web Components (LWC) for business requirements.
- Handled user and access management, including permission sets and role hierarchy.
- Conducted testing and deployment of Salesforce features.

PROJECTS

NewsWave – A News Platform | [Link](#) | [GitHub](#) | React, Node, Express, MongoDB, News API

- **NewsWave** is a **web based new platform** that provides user with a comprehensive and up-to-data source of news and information.
- Included features like bookmarking and liking the News, giving it social media like experience.
- Integrated **NewsAPI** to fetch real-time news articles and updates from various sources, enabling dynamic content delivery in the application.

Tool Rental Platform | [Link](#) | [GitHub](#) | React, Node, Express, MongoDB

- Built a full-stack tool-sharing platform for users to borrow and lend tools locally with integrated listings, filters.
- Designed a personalized dashboard for managing tool activity and promoting peer-to-peer rentals.
- Implemented approval based messaging between users using Socket.

E Canteen Web Application | [Link](#) | [GitHub](#) | React, Node, Express, MongoDB

- A **collaboratively** built smart e-canteen platform that enables real-time food ordering for users and efficient **inventory** and **order** management for admins.
- Built frontend components and pages based on backend API specifications provided by teammates, while actively managing code through GitHub.
