Databases: MongoDB, PostgreSQL

Platforms: Vercel, Render

PROJECTS

NewsWave – A News Platform | [React](#), [Node.js](#), [Express.js](#), [MongoDB](#), [NewsAPI](#)

- **NewsWave** is a **web based new platform** that provides user with a comprehensive and up-to-data source of news and information. It contains user account with giving a user functionality of liking and bookmarking the news.
- Integrated **NewsAPI** to fetch real-time news articles and updates from various sources, enabling dynamic content delivery in the application.

EduTech – A Learning Platform | [Link](#) | [GitHub](#) | [React](#), [Node.js](#), [Express.js](#), [MongoDB](#), [Cloudinary](#)

- Built a **learning platform for online education** with core functionalities like user accounts for students and instructors, access course by students and create, update course by instructors laying the groundwork for an engaging social experience.
- **Enhanced application security** by implementing JWT Authentication and secure cookies, ensuring robust user access control mechanisms from the start.
- **Optimized application scalability** by leveraging Cloudinary for image storage and retrieval, resulting in a high-performance platform ready for future growth.

Snakes and Ladder Game | [GitHub](#) | [Java](#)

- Developed a **Snakes and Ladders** game using **Java**, featuring interactive gameplay with player scores, dice rolls, and a messaging panel for in-game events.
- Implemented game controls for restarting, quitting, and automatic position updates after landing on snakes or ladders, enhancing user experience through dynamic feedback.
